## **Description of Service:**

To maintain proper function and efficiency, Mistbuster and TriMist electrostatic cells need to be cleaned routinely 2-4 times per year depending on the application. AFS will ship clean and tested cells to your facility where your maintenance personnel will replace the dirty cells with clean ones, and place the dirty ones in the provided bags and boxes then ship them back to our facility.

- No wastewater to dispose of.
- No cleaning detergents, and no expensive parts washers to purchase, install, and maintain.
- Frequent cleaning optimizes mist collectors efficiency and performance.
